Rawan Ezzat My portfolio

## Summary

BIS graduate from Helwan University with practical experience in web development. Skilled in building responsive web interfaces and working with back-end systems, APIs, and databases. Strong understanding of software development principles and agile teamwork. Passionate about problem-solving, learning new technologies, and delivering clean and efficient code.

## Education

**BSc in Business Information Systems (BIS),** *Helwan University* 10/2022 – 06/2026
Faculty of Commerce Helwan university GPA 3.87 Zamalek, Egypt

## Skills

**Technical Skills**

- HTML, CSS, JavaScript
- Front-end Development (Responsive Web Design)
- Back-end Development Basics
- RESTful APIs
- Databases (SQL / MySQL)
- Software Development Life Cycle (SDLC)
- Version Control (GitHub)
- Basic Problem Solving & Debugging
- Microsoft Office (Word, Excel, PowerPoint)
- Power BI

**Soft Skills**

- Communication Skills
- Teamwork & Collaboration
- Time Management
- Problem-Solving
- Adaptability
- Attention to Detail
- Work Under Pressure
- Fast Learning Ability

## Experience

**full stack Development Training (.NET),** *Hero Company* 09/2026 – 10/2026
Worked on real-world full stack development tasks using .NET, database integration, and system development. Fifth Settlement

**.NET Backend Instructor,** *Code Plus Software Company* 08/2026 – 09/2026
Delivered online training sessions covering .NET backend development fundamentals. Explained backend programming concepts, C#, ASP.NET Core, Web APIs, and database integration. Guided trainees through practical coding exercises and backend development tasks. Assisted trainees in understanding RESTful APIs, CRUD operations, and software development concepts. Provided technical guidance, answered questions, and supported trainees in solving programming problems. online

**Front-End Development Training,** *Three Dos Helwan University* 03/2026 – 07/2026
Developed responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap. Integrated frontend applications with RESTful APIs provided by the backend team. Used JavaScript Fetch to retrieve and send data through APIs. Worked with API responses and displayed dynamic data in the user interface. Applied frontend development concepts through practical web projects. Cairo, Egypt

**Back-End Development Training (.NET),** *Hero Company* 09/2025 – 10/2025
Worked on real-world back-end development tasks using .NET, database integration, and system development. Fifth Settlement

**English,** *English Clinic* 02/2025 – 09/2025
Cairo, Egypt

**Back-End Development Training (.NET),** *Information Technology Institute (ITI)* 07/2025 – 08/2025
Completed intensive training in back-end development using .NET, including building server-side applications and understanding software development lifecycle (SDLC). Online

**Flutter Development Program,** *SCCI – Cairo University* 12/2024 – 08/2025
Participated in a Flutter development program focused on building cross-platform mobile applications. Cairo, Egypt

**Software Development Training,** *Prodigy InfoTech Company* 09/2024 – 10/2024
Gained hands-on experience in software development fundamentals, programming logic, and problem-solving through practical tasks. Online

**Web Development Training (PHP),** *Three Dos Helwan University* 04/2024 – 09/2024
Learned PHP fundamentals and backend development concepts, and applied them in developing basic web applications. Cairo, Egypt

**Banking Training Program,** *Commercial International Bank (CIB)* 07/2022 – 08/2022
Completed training in banking operations and gaining practical exposure to real banking workflows and financial services processes, including digital transformation, data literacy, financial literacy, entrepreneurial skills, and preparation for the future digital era. Online

## Languages

**English**
B1

**Arabic**
Native

## Projects

**KEFAYA — Food Waste Reduction Platform,** *PHP Web Application | Graduation Project*
Developed a platform that helps reduce food waste by connecting restaurants, users, and charities. Enabled restaurants to offer surplus food at discounted prices or for donation. Connected charities with available food donations to help reduce food waste.

**E-Commerce Website,** *PHP Web Application*
Developed an e-commerce website using PHP that allows users to browse products, manage a shopping cart, and simulate online purchasing functionality.

**Task Planner Website,** *PHP Productivity Web App*
Built a task management system using PHP to help users create, organize, and track daily tasks efficiently.

**Freelancer Website,** *PHP Service Platform*
Created a freelancer platform using PHP that connects clients with freelancers and supports project posting and basic user management.

**Movies Application,** *Flutter Mobile App*
Developed a mobile application using Flutter to display movie listings with details and user-friendly navigation.

**Pets Application,** *Flutter Mobile App*
Built a Flutter application for pet-related services and information, providing an interactive and simple user experience.

**Smart Room Application,** *Flutter Smart System App*
Developed a smart room application using Flutter to simulate controlling and managing room functions through a mobile interface.

**Leave System for Hero Company,** *.NET Web Application*
Developed a leave management system using .NET to handle employee leave requests, approvals, and tracking within the company.

**Management System (ITI Training),** *.NET Enterprise System*
Built a management system including employees, departments, projects, and inventory using .NET, focusing on database integration and system structure.

**Credit Card System,** *.NET Web Application*
Built a credit card system simulation that manages card information, transactions, and basic financial operations with secure data handling.

**Library System,** *.NET Web Application*
Developed a library management system to manage books, track availability, and organize borrowing and returning processes efficiently.

**Gaming Website,** *Frontend Web Project*
Designed and developed a responsive gaming website using HTML, CSS, JavaScript, and Bootstrap. Created interactive pages and user-friendly navigation. Focused on responsive design and modern frontend UI.

**School Finder Website,** *Frontend Web Project*
Designed and developed a school discovery and comparison website using HTML, CSS, JavaScript, and Bootstrap. Created pages for browsing schools, viewing school details, and comparing available options. Built a responsive and user-friendly interface. Integrated backend-provided RESTful APIs with the frontend to handle dynamic data and user interactions.

**Waste Management & Recycling Website,** *Frontend Web Project*
Designed a website for a waste management company that connects customers with recycling factories. Presented a system for collecting household waste and categorizing recyclable materials into metal, paper, and plastic. Developed responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap. Integrated backend-provided RESTful APIs with the frontend to handle dynamic data and user interactions.

**Visitor Management System for Hero Company,** *.NET Web Application*

- Developed a web application to manage visitor registration, check-in, and check-out.
- Implemented visitor search, filtering, and visit history tracking.
- Designed a responsive, bilingual (Arabic/English) dashboard.
- Integrated SQL Server using Entity Framework Core and added Excel/PDF export functionality.
